As the study of environmental policy and justice becomes increasingly significant in today–™s global climate. Rethinking Sustainable Cities: Multilevel Governance and ... While sustainable cities have been promoted as a desirable goal within a variety of policy contexts, critical questions concerning the extent to which cities and local governments can address the challenges of sustainability remain unanswered.

Rethinking Sustainable Cities: from slogan to implementation MUF has three pillars of focus: Fair Cities, Accessible Cities and Green Cities. Researchers are writing background papers on each of these pillars, foreshadowing some of the chapters to be included in the MUF–™s free online book that will published before the MUF inaugural conference to be held in Gotham in September this year. Rethinking the Future of Sustainable Urban Development Rethinking the future of sustainable urban development is no longer a choice–™ it has become a necessity. During the last century, the world–™s population has increased significantly, and more people are living in cities today than ever before. Mega-cities with more than 10 million people are also on the rise. OAPEN Library - Rethinking sustainable cities: Accessible ... Sustainable urbanisation has moved to the forefront of global debate, research and policy agendas over recent years. Rapid urbanisation throughout China, India and many other low and middle income countries poses new challenges both locally and internationally at a time when urban areas worldwide are threatened by climate/environmental change.
